

**Open PHACTS**  
Open Pharmacological Space

- Open systems need an engaged community, to grow, develop and sustain. Joining as an Associated Partner is the first step.
  - Associated Partners: we have a MoU ready to sign for mutual support and exchange of ideas, data or technology
    - Most will fit here, regular contact, support and review
    - Opportunity to present ideas and use cases to core Open PHACTS team
  - Development Partnerships: when we want to do some more specific work together, develop APIs, new data, algorithms etc. Greater access to the core of the project through agreed collaborative annexe to MoU
    - Eg we are working actively on a certain business question

## How to get involved....

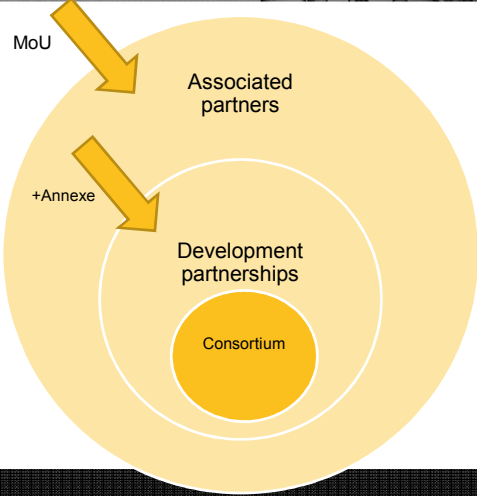

**Open PHACTS**  
Open Pharmacological Space

**Associated partners**  
Organisations, most will join here  
Support, information  
Exchange of ideas, data, technology

28 current members

## Open PHACTS and the scientific community

Open Pharmacological Space

- We actively manage our partners, and the wider community
- We term this the Open PHACTS Waiting Room, managed by a Gatekeeper
  - Our relationships with all partners are visible at [openphacts.org](http://openphacts.org)
    - What we are doing together and why
    - Opportunities to engage and develop will open and based on project needs
- We hold regular community workshops and events
  - Learn more about Open PHACTS and the Open Pharmacological Space
  - Participate in new ideas and functions
    - Engage in development of new use cases, help us answer new questions
  - Contribute to development, and engage in plans for sustaining the Open Pharmacological Space
- Please contact us to join the debate [www.openphacts.org](http://www.openphacts.org)
